8TH SYMPOSIUM "MORPHOMETRY AND SHAPE EVOLUTION" - Dijon, France June 2nd and 3rd 2014

Published on 3 June 2014

The 8th national symposium « Morphométrie et Evolution des Formes » will be held in Dijon (Université de Bourgogne) on June 2nd and 3rd 2014.

This meeting aims to promote exchanges between users of morphometrics in various fields of evolution including evolutionary biology, development, bio-archaeology, palaeontology, and ecology. Beyond methodological aspects, it concerns all scientists interested in the quantification and the study of shape of biological objects.

The meeting is open to everybody, in the limit of available space. Presentations will correspond to short oral presentations or posters. Because the SMEF is a French meeting, most of the communications are given in French but the use of English is also welcome.

There is no registration fee to the symposium but registration is necessary for organisational reasons.
