ALPHY 2021 : Bioinformatics and Evolutionary Genomics

February 2 and 3, 2021 – Virtual Meeting. (février 2021)

Publié le 2 février 2021

ALPHY is an annual meeting dedicated to the field of Bioinformatics and Evolutionary Genomics (ALPHY = ALignments and PHYlogeny). The main goal of this meeting is to promote informal exchanges in this highly multidisciplinary field, and to encourage young scientists to present their work.

This year, Alphy is organized by Sophie Abby and her colleagues (TIMC-IMAG Equipe Génomique et Evolution des Microorganismes, CNRS, Université Grenoble Alpes). Given the covid situation, we decided that Alphy 2021 will be entirely virtual (too bad for the view on snowy mountains !).

The program will include four invited speakers (Camille Berthelot, Guillaume Borrel, Philippe Remigi and Eduardo Rocha) and 24 contributed talks.

Registration to the meeting is free, but mandatory :
