Statistical Methods in Genomics

Published on 31 January 2011

The 2011 edition of the workshop on Statistical Methods for Post Genomic Data (SMPGD) will be held in the Curie Institute (Paris) on January 27-28. This workshop gathers statistician who are interested in methodological developments devoted to the analysis of high throughput biological data. Speakers are mainly statisticians that present their work and the tools developed for the community. This year three sessions are focused on Recent Advances in multiple testing, hight throughput sequencing and statistical genetics.
